CORE SKILLS

PHP

Laravel

JavaScript

Vue.js

Flutter

VB.NET

HTML

CSS

SQL Server

MySQL

DB2

Photoshop

FOCUS AREAS

- Mobile, desktop, and web applications
- Operational systems and workflow tools
- Reporting and process automation

EDUCATION

D3 Management Informatics
UBSI, 2012

S1 Information Systems
STMIK Nusa Mandiri Jakarta, 2013

TECHNICAL STRENGTHS

Application: PHP, Laravel, JavaScript, Vue.js, Flutter, Visual Basic .NET, HTML, CSS.

Database and workflow: SQL Server, MySQL, DB2, reporting, process mapping, maintenance, and user support.

Usman AS

PROGRAMMER | MOBILE, DESKTOP, AND WEB DEVELOPER

Programmer with 10+ years of experience building practical applications that improve workflows, reporting, and operational efficiency across textile industry operations and custom client needs.

PROFESSIONAL SUMMARY

I design software for real operational needs, from internal production support systems to mobile dashboards and workflow tools, combining database design, development, and close collaboration with users.

PROFESSIONAL EXPERIENCE

Programmer & System Developer

10+ Years Experience | Textile Industry and Business Operations

- Developed internal applications for production, reporting, and daily operational workflows.
- Built desktop, web, and mobile solutions based on practical process needs.
- Designed database-backed tools for tracking, monitoring, reporting, and efficiency improvement.
- Maintained existing systems and translated requirements into clear application flows.

Freelance Developer

Custom Application and Workflow Solutions

- Created custom systems for practical automation and easier data management.
- Supported planning, deployment, maintenance, and user adoption.

SELECTED PORTFOLIO

Sup.net Mobile App
Mobile dashboard for billing, customers, and payments.

Sup.net Billing System
Billing and payment screens for internet service operations.

Handyman Service App
Service discovery, booking, provider mode, and profile screens.

Operational Systems
Internal tools for production, reporting, and efficiency.

Knitting Production System
Desktop app for production input and machine stop tracking.

IT Activity Dashboard
Team activity, task, and open ticket monitoring dashboard.

MR.Net Billing System
Customer billing, payment, and report management system.

SistemRT
Resident data, housing map, dues, and community administration system.
